Our latest release is here!

With our latest version, we're bringing you more great features that will make running your business even smoother and more time efficient! For detailed information and articles, please log in to your back office and click on **HELP**.
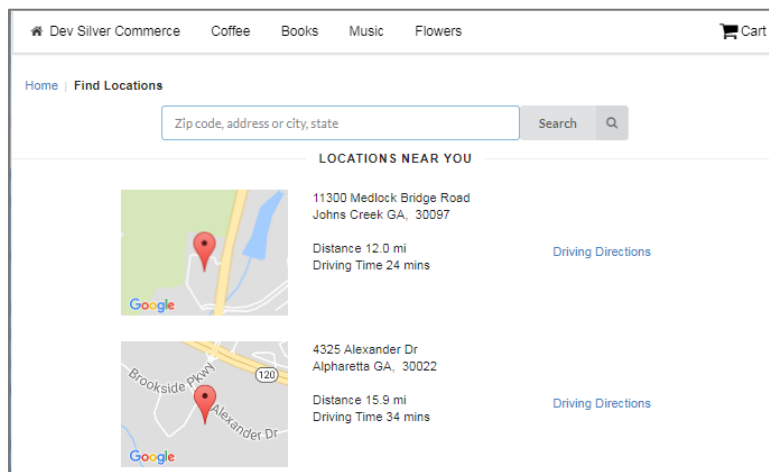

CONTENTS

STORE LOCATOR

We are making it fast and easy for your customers to find your stores.

Your commerce site will now automatically identify a customer's location (based on their web browser's privacy settings) to associate them with your closest store.

In addition, we have added a Find Locations page that provides your customers with the ability to search for near-by stores via a list or by entering zip code, state, city or address. This page also includes google map images and links to driving directions.

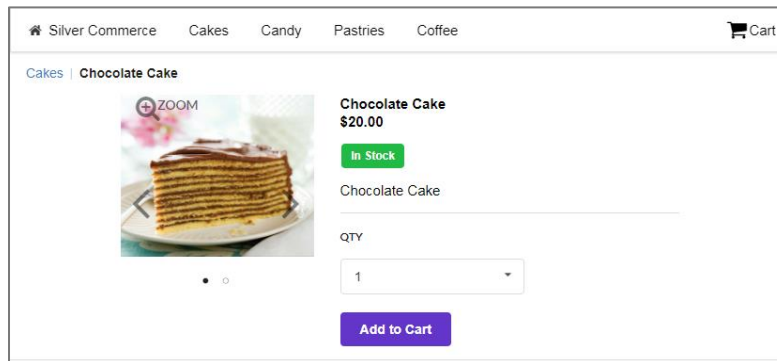

NAVIGATION BREADCRUMBS

We have added navigation links known as "breadcrumbs" in order to display positions in a navigational path and enable reverse navigation to a previous location.

DISPLAY ALTERNATE PRODUCT IMAGES

You can now display alternate product images. Showing multiple angles or views of a product ensures the online consumer has a better understanding of what the product is, allowing them to make a more informed buying decision.

SORT ORDER AND PRODUCT RANKING

You can now rank your products so that products with the highest rankings remain pinned at the top of the list regardless of the default sort order.

MULTIPLE BANNERS

You can now upload multiple banners to display more on your commerce site. Banners carrousel automatically, allowing you to advertise additional offerings or aspects of your business to your customers.
