# Silver Pro Restaurant Release 5.4

With our latest version, we're bringing you more great features that will make running your business even smoother and more efficient. For detailed information and articles, log into your back office and click **HELP**.

COMPULSORY CASH DARWER FOR ANDROID

We've extended the compulsory cash drawer feature to the Android platform.

For added security, you can now enable the compulsory cash drawer setting at the point of sale. This restricts use of the POS when the cash drawer is open.

To configure from the POS Settings, check the "Disable POS when either cash drawer is open" checkbox.

Once enabled the user must close the cash drawer after each transaction before proceeding to the next.

IOS14 SUPPORT

Silver Pro Restaurant iPad POS and KDS apps now support iOS14.
