INVENTORY TRACKING FLAG

When adding or editing an item in the Silver Back Office, you can select whether you want to track inventory for the item or not. Items whose inventory is not tracked will be filtered out of the inventory management functions so you can focus on the items for which you are tracking inventory.

OPEN LOYALTY ENHANCEMENTS

For your third-party loyalty providers using our loyalty integration, we now send back any rewards selected prior to ticket completion. This allows the loyalty provider to provide a customer receipt message containing the most up-to-date loyalty progress information. Additionally, we send ticket information for all customers to give merchants better insight into how well their loyalty programs are performing.
