

Our latest release is here!

With our latest version, we're bringing you more great features that will make running your business even smoother and more time efficient! For detailed information and articles, please log in to your back office and click on **HELP**.

MANUALLY ADD LOYALTY POINTS/PUNCHES

If you are using Silver's built-in loyalty, you can manually add points or punches to a customer's loyalty balance in the back office. This is helpful if you forget to assign a customer to the ticket or have two customer records for the same person you need to combine into one.

You can also add a loyalty balance to customers during a customer list import. You can control which employees can manually add loyalty points and punches via the User Roles.

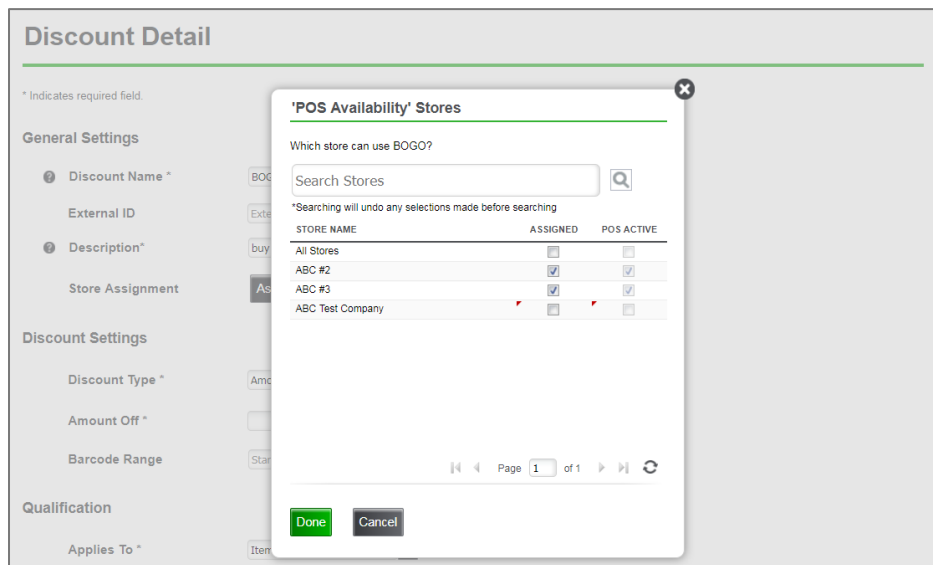

ASSIGNING MODIFIER GROUPS DURING ITEM IMPORT

New columns on the important template allow you to identify what modifier group the item is modified by. You can Assign up to 5 modifier groups to an item when using the Silver back office item import template.

| L | M | N | O | P | Q |
|-----------------|--------------|---------------|----------------|---------------|-------------|
| Item Name | Package Cost | Units/Package | Primary Vendor | Units on Hand | Modified By |
| Beer Bottle | 8.50 | 24 | ABC Vendor | 100 | |
| Cake Slice | | | Cake King | 20 | |
| | | | | 50 | Toppings |
| | | | | | Toppings |
| | 7.25 | 24 | DEF Vendor | | |
| Roasted Chicken | | | | 10 | Cheese |
| Roasted Turkey | | | | | |

STORE ASSIGNMENT FOR DISCOUNTS

In a multi-store, you can assign discounts to specific stores so that the POS only displays discounts assigned to that store.

GIFT CARD IMPROVEMENTS (ANDROID)

Give your customers store credit for returns. Refunds can be applied to a new store gift card or an existing gift card.

In addition, you can enter a PIN during manual gift card entry if it is required by your gift card processor.

*These features are already a part of the iOS application.
